PRESS RELEASE

i-team Global launches the revolutionary [i-walk](#) - 300m² of floor cleaning with just one minute of set up time

What happens when the [i-mop XL](#) meets co-botic technology? The i-walk is born; a patented floor cleaning tech that removes the repetition from commercial floor cleaning in record time with much greener performance and excellent results.

i-team Global is excited to announce the launch of the i-walk, a groundbreaking co-bot that redefines cleaning, delivering unmatched efficiency and precision cleaning. Available from 1st October 2024, i-walk, transforms the i-mop XL into a co-botic and cleans up to 300m² with only one minute of set-up time.

What makes i-walk special?

The i-walk is set to revolutionise floor cleaning performance.

It's a high-tech enhancement of the hugely successful i-mop XL, with an automated driving system that takes over the hard work. It has the ability to clean an impressive 700m² in just one hour, saving operatives a ton of cleaning and setup time.

i-walk can also work tirelessly for up to four hours, thanks to its extended battery life, cutting down on those disruptive downtimes. The flow of service doesn't have to be interrupted! With this kind of performance, efficiency soars while operational costs plummet.

Greener and safer

For the sustainably conscious business, the i-walk is an impressive eco-friendly solution. It uses an advanced recovery system that slashes water usage by 70% and reduces chemical use, making it a greener and more environmentally responsible floor cleaning choice.

Not only that, the i-walk's advanced suction system ensures surfaces dry very quickly, reducing the risk of slips and falls after cleaning. But safety doesn't stop there as it directly benefits its operators too. Cleaning operatives will love the i-walk because it frees them from repetitive, time-consuming tasks, which can be strenuous to complete. Instead, they can focus on higher-value work, making their jobs more enjoyable and less physically demanding.

Enabling service delivery even when short-staffed

What's more, from a strategic viewpoint, the i-walk is a game-changer for cleaning companies facing staff shortages. With fewer hands on deck, the pressure to deliver top-notch service is a challenge. The i-walk bridges that gap, offering unparalleled efficiency gains and helping companies to maintain high cleaning delivery standards with reduced operatives on site.

Frank Van Den Ven, founder and CEO of i-team Global, says, *"The focus of i-team is dedicated to elevating the role of cleaners, transforming them into respected hospitality professionals, while also reducing the use of water, energy and cleaning detergents. Our*

goal is to shift perceptions about cleaning and those who undertake it. Tools like the i-mop and i-walk are central to this mission. Since its patent in 2014, the i-mop has revolutionised the cleaning industry. i-team continues to lead the market with innovative solutions that integrate high-tech advancements into a traditionally low-tech field.”

Notes to editors

About i-team Global: i-team Global, headquartered in Eindhoven, specialises in innovative cleaning solutions designed to enhance efficiency and sustainability. With a commitment to quality and technological advancement, i-team Global serves a global market with a range of cutting-edge products.

What is the i-mop?

The [i-mop XL](#) is a patented flexible floor scrubber dryer that revolutionised cleaning in 2014. Intelligent mopping converted manual mopping to mechanical mopping that cuts the labour time with 60%, the water usage with 75% and the energy use with 50%. Therefore the i-mop pays for itself within a year.
